Professional Summary

Java Full Stack Developer building and shipping web applications with Java, Spring Boot, React.js, and MySQL. Debugs production issues, collaborates in Agile teams, and adapts quickly to new codebases. Led teams of 10+ in technical and non-technical settings; CGPA 9.15/10 in B.E. Computer Science.

Education

Visvesvaraya Technological University, Belagavi, Karnataka

2022 – 2026

Bachelor of Engineering in Computer Science

CGPA: 9.15/10

Relevant Coursework: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems (OS), Artificial Intelligence & Machine Learning (AI/ML), Web Development, Generative AI, Cloud Computing, Agile, SDLC

Technical Skills

Languages: Java, JavaScript, SQL, Python

Frontend: React.js, HTML5, CSS3, JavaScript (ES6+), Bootstrap, Responsive Web Design

Backend: Spring Boot, Spring MVC, RESTful API Development, Hibernate, JPA, Core Java, OOP

Databases: MySQL, SQLite, Database Design, Query Optimization

Tools & IDEs: Git, GitHub, Maven, Postman, IntelliJ IDEA, Eclipse, VS Code

Methodologies: Agile, Scrum, SDLC, Sprint Planning, Code Review, Unit Testing

Core CS Concepts: Data Structures & Algorithms (DSA), OOP, DBMS, Operating Systems, System Design Fundamentals

Professional Skills: Stakeholder Management, Team Leadership, Cross-functional Collaboration, Communication

Professional Experience

Algorithms 365

Jan 2026 – May 2026

Software Engineer Intern

Bengaluru (Remote)

- Partnered with a senior engineer with 16+ years of experience to build and deliver 5+ production features using Java, Spring Boot, and React.js.
- Owned codebase debugging by tracing issues to root causes, reducing recurring bugs by 30% through targeted fixes.
- Contributed to sprint planning and peer code reviews, supporting a 2-week release cadence while maintaining high code quality.

Projects

JanaAushadhi – Generic Medicine Discovery Platform | *Team Lead*

2026

- Led a team to develop a generic medicine discovery platform enabling users to search, compare, and explore 50+ medicines.
- Built a pharmacy locator module using 500+ pharmacy records to help users identify nearby stores stocking requested medicines.
- Designed and implemented responsive React.js interfaces, improving search experience and application usability.
- Developed RESTful APIs and integrated MySQL databases to support medicine management and pharmacy search functionality.

Tech Stack: Python, Flask, React.js, MySQL, SQLite, REST APIs, Git, GitHub

Where Is My Bus – Real-Time Transit Tracking System | *Team Member*

2025

- Developed a real-time transit tracking system using Java and React.js, enabling users to monitor live bus locations across 100+ routes.
- Integrated Google Maps API to visualize live bus movement and provide estimated arrival times across 50+ bus stops.
- Designed and managed a MySQL database containing 1,000+ route and stop records, ensuring efficient data retrieval and route management.
- Implemented RESTful APIs for seamless communication between the frontend, backend, and location-tracking services.

Tech Stack: Java, React.js, MySQL, REST APIs, Google Maps API, Git, GitHub

Leadership

Microsoft & British Council Program

Jan 2026 – Apr 2026

Team Lead

- Led a 10-person team through a program focused on English communication and workplace skills, run jointly by Microsoft and British Council.
- Worked directly with program leaders from both organizations and represented the team through to course completion at the regional and national level.

Web Development Club, Government Engineering College, Karwar

Apr 2024 – May 2026

Club Lead

- Mentored 100+ students in HTML, CSS, and JavaScript as part of the college's web development club.
- Ran hands-on workshops to give students real practice building projects, not just following along with slides.
- Handled club logistics and supported student teams as they worked through their own builds.
